WORK EXPERIENCE

[February 2020 – Present] IT-INCUBATOR, Minsk

Front-End Developer
- Created custom reusable react components (inputs, buttons, checkboxes, circular progress bars, etc.)
- Converted class components to functional (with hooks-based interaction)
- Implemented secure authentication page (Log in and Sign up)
- Implemented mobile-first approach to existing project
- Added form validation and back-end functionality with Node JS and Express to make possible to send e-mails from Contacts page
- Applied Material UI library
- Took part in developing company's own CRM for local needs

IT Officer
- Maintained Embassy's web page
- Provided technical and IT support for all Embassy staff
- Organized digital/technical part of Embassy events
- Ensured and maintained computer infrastructure for the Embassy and provided advisory support for replacing defective equipment as necessary
- Was responsible for technical issues, including printers, photocopiers, telephone, fax, and web conferencing platforms
